# PROJECT DATA

Reference number: 2023-1-SI01-KA220-HED-000151704

Duration: October 2023 – September 2026

## PROJECT BACKGROUND

Ineffective and ambiguous communication can be a contributing cause of shipping accidents.

Communication significantly deviates from the standard protocol of communication.

MET institutions and maritime authorities are responsible for providing maritime communication education and training.

Technologies allow the creation of digital tools for self-directed life-long learning.

Scant attention to the perspective of shore service operators as a key communication agent.

Need for harmonization between and revision of the documents that define the standard protocol of communication.

## MAIN PROJECT RESULTS

Scenarios for student simulations – September 2024.

Instructional videos for routine maritime communication – December 2024.

Chatbots for routine maritime communication – March 2025.

Recommendations for a revision of the standard protocol of communication – August 2026.
