

## Tug operations II

DESCRIPTION	VTS contacts the vessel Dentex to prepare for tug operations	
PARTICIPANTS	Vessel Traffic Service operator, Master	
PROMPTS	VTS operator	VTS operator contacts the vessel to inform them that the pilot will arrive at 10.30 a.m.
	Vessel	The master receives the call. He/she acknowledges all the information from the VTS operator.
	VTS	In the following turn, the operator asks them to prepare two messenger lines, one for the tug.
	Vessel	Vessel acknowledges.
	VTS	Then, the operator enquires about the spool piece in the pump room. He/she wants to know whether it is connected.
	Vessel	He/she did not hear well the part about the spool piece, so he/she needs the operator to repeat the message.
	VTS	He/she repeats the previous message about the spool piece in the pump room.
	Vessel	The spool piece is connected. Master wants to know when they have to heave up anchor so they can be ready for the pilot.
	VTS	The operator tells the vessel that he/she will call them back when they will have to heave up the anchor.
	Vessel	Master acknowledges.
