Introducing DigiMar Videos

Welcome to DigiMar videos!

In this series, we will explore effective routine maritime communication. Clear and precise communication is key to maritime safety and efficiency. That is why mastering these standards can make a real difference.

These videos are designed for:

- students at maritime education and training institutions,
- VTS operators seeking a refresher, and
- anyone interested in maritime communication.

These videos feature examples from real-life scenarios. They have been kept in their authentic form to support learning, even when they include mistakes or deviate from maritime communication standards. Ship and port names have been anonymized.

The content in DigiMar instructional videos is based on directions, recommendations, and rules mostly provided by the International Association of Lighthouse Authorities in the VTS Voice Communications and Phraseology published in 2022.

Two supporting documents are the Manual for Use by the Maritime Mobile and Maritime Mobile-satellite Services published by the International Telecommunication Union in 2020, and the Standard Marine Communication Phrases published by the International Maritime Organization in 2001.

In these videos, we will cover guidelines on various aspects of:

- structuring clear and precise routine communication messages,
- exchanging information efficiently using VTS phraseology,
- avoiding ambiguity, and
- ensuring the formality and clarity of speech.

We recommend watching the videos in sequence to develop a solid understanding. Take notes, pause when necessary, and replay sections to grasp the key concepts fully. For your convenience, PDF files of all video scripts can be downloaded from the project website.

We value your feedback! Please feel free to contact us via email, or leave a message on our Facebook or LinkedIn pages.
