

Call for Participation to

Evaluating Digital Tools for Maritime Education and Training

Are you an educator eager to enhance digital learning in maritime training?

Are you a maritime professional looking to improve communication and situational awareness?

Are you a student interested in cutting-edge digital tools for lifelong learning?

We are seeking participation from maritime educators, trainers, industry professionals, and students who are actively involved in maritime education and training. Your insights and feedback will be invaluable in shaping the future of digital education in the maritime sector.

As part of DigiMar (Digital Education for Maritime Communication¹) we invite you to participate in the **evaluation** of innovative digital education tools, prompted by international regulations and designed to enhance maritime education, training, and lifelong learning.

The evaluation will take place online on April 11th, 2025, from 13:30 – 15:00.

<https://chalmers.zoom.us/j/67304482803>

Evaluation Process: During the event, participants try out and discuss a range of digital education tools. You will be asked to provide feedback on efficiency, usability, and overall impact on the provided learning experience. Information and access to materials will be sent out upon registration, one week prior to the event.

Objective of the evaluation: The received feedback will be used to assess and improve expected usability of our tools for interactive learning of real-time routine communication exchange and situational awareness, which are critical in maritime environments.

How to Participate: To participate, simply email us at digimar.eu@yahoo.com and we will contact you promptly. Mark your e-mail **Chalmers Multiplier Event**. Detailed instructions and access to the digital tools will be provided upon registration.

Contact Information: For any questions or further information, please contact us at digimar.eu@yahoo.com and/or annamaria.gabrielli@chalmers.se

We look forward to your participation and valuable contributions to this important initiative.

Sincerely,

Annamaria Gabrielli
