Introducing DigiMar GPT

Welcome to DigiMar GPT!

The DigiMar GPT chatbot is designed to help users develop routine maritime communication skills and competencies. To communicate effectively with DigiMar GPT, basic knowledge of routine maritime communication rules and recommendations is essential.

This tool is intended for:

- VTS operators and their trainers,
- students at maritime education and training institutions and their teachers, and
- anyone interested in maritime communication.

There are 40 training scenarios available. They are based on authentic exchanges between vessels and VTS operators and can be applied to a variety of geographical contexts.

In every scenario, the user takes the role of the VTS operator, while the chatbot acts as the vessel.

To use DigiMar GPT, you only need a free Chat GPT account.

To start a training session, type or say "Start VTS training" [here](#).

Each time, you will see three random scenarios. Reply with either the scenario number or the scenario title. At the end of each scenario, you will receive concise descriptive feedback on your performance. We hope this will help you improve your routine maritime communication skills.

Please help us upgrade DigiMar GPT by filling out this survey: <https://1ka.arnes.si/digimar>

If you have questions or comments, leave a message on the DigiMar [Facebook](#) or [LinkedIn](#) pages.

You may now proceed to the chatbot. Thank you for choosing DigiMar!
